

Laptop Request Catalog Item in ServiceNow

Project Final Report

1. Introduction

- **Project Name :** Laptop Request Catalog Item
- **Team ID :** LTVIP2026TMIDS76292
- **Team Leader :** Balla Harshitha
- **Team Members :** Jangareddy Veera AdiSeshu

2. Project Overview

- **Objective:**

To simplify and streamline the laptop request process for employees by creating a dynamic ServiceNow catalog item with validation, reset functionality, and audit tracking for governance and deployment.

- **Description:**

- This project creates a user-friendly catalog item within ServiceNow to enable employees to request laptops. It eliminates manual inefficiencies by introducing form logic, guided inputs, dynamic visibility of fields based on user selections, and form reset capability. All submissions are tracked, and the request lifecycle is automated through workflows and approvals.

- **Key features:**

Feature	Description
Catalog Item Creation	Enables users to raise requests via a clean, guided form.
Dynamic Form Behavior	Fields show/hide based on selected laptop type or department.
Form Validation	Mandatory fields and valid options ensure proper data collection.

Reset Button	Clears all fields instantly for re-entry.
Workflow Automation	Routes requests through approval chains based on roles or departments.
Audit & Tracking	All actions logged for traceability and governance.
Notifications	Sends updates to requestor and approvers.
Role-Based Access	Only authorized users can access or approve requests.

3. Project Ideation Phase

- **Project Title:** Laptop Request Catalog Item in ServiceNow
- **Problem Statement:** Employees require a simplified, quick process to request work laptops. The existing manual method causes delays and lacks dynamic validation. This project addresses the need by automating the request process through a ServiceNow catalog item with enhanced user experience, form logic, and audit control.

4. Requirement Analysis Phase

- **Tables:** Use existing sc_req_item table to store request records.
- **Catalog Item:** Create a new Service Catalog item for laptop request.
- **Client Scripts & UI Policies:** Implement logic for dynamic field display.
- **Workflow:** Automate approval and fulfillment stages.
- **Reset Button:** Add catalog client script for resetting fields.
- **Access Control:** Restrict visibility of request forms and tasks based on roles.
- **Tracking:** Enable audit logs and activity tracking.
- **Conclusion:** Ensure the form is user-friendly, functional, and audit-compliant.

5. Project Planning Phase

- **Project Timeline:**
- **Ideation**
- **Requirement Analysis**
- **Design (Form fields, UI policies, Client Scripts)**
- **Development (Catalog item, workflows)**
- **Testing (Impersonation, field behavior)**
- **Review & Finalization**
- **Risk Management:**

Risk	Probability	Impact	Mitigation Strategy
Workflow not triggering properly	Medium	High	Test workflows independently in sub-prod
Reset button fails	Low	Medium	Add fallback catalog client script
Field visibility not dynamic	Medium	High	Use combinations of UI Policies and scripts

- **Task Allocation:**

Task	Assigned To	Time Estimate	Tools Required
Catalog Item Design	Developer	1 Day	ServiceNow Studio
Client Script Development	Developer	2 Days	Catalog Client Scripts
Workflow Configuration	Admin	2 Days	Flow Designer
Reset Button Implementation	Developer	1 Day	Catalog UI Script
Testing & Review	QA Analyst	1 Day	User Impersonation

6. Project Design Phase

1. Create Catalog Item

- Navigate to **System Update Sets > Local Update Sets**
- Click on **New**, provide a name like Laptop Request Form Update Set
- Save and set it as the current update set
- This will track all changes made during development for easy migration to other instances

2. Create Service Catalog Item

- Go to **Service Catalog > Maintain Items**
- Click **New** to create a new Catalog Item
- Fill in:
 - **Name:** Laptop Request Form
 - **Catalog:** Service Catalog
 - **Category:** Hardware or Employee Services
- Save the item

Catalog Item
Laptop Request

Build and modify items faster with the improved [Catalog Builder](#).

Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies.

- Enter a Name and Short description to display for the item.
- Enter a Price, approvals, variables, and other information as needed.

Name:

Application:

Catalogs:

Category:

State:

Checked out:

Owner:

Active: ☒

Fulfillment automation level:

Item Details | Process Engine | Picture | Pricing | Portal Settings

Short description:

3. Add Variables

Step1:

- After saving the catalog item form scroll down and click on variable(related list)
- Click on new and enter the details as below

1. Variable 1:Laptop Model Type:

Single line text

Name: laptop_model

Order:100

- Click on submit
- Again click on new and add Remaining variables in the above process

Team Project- Laptop Model | Variable | Team Project

Variable: Laptop Model | item_option_new [scratchpad][table fields][toggle label]

Application | sys_scope: Global

Type | type: Single Line Text

Catalog item | cat_item: Laptop Request

Order | order: 100

Active | active: ☒

Mandatory | mandatory: ☐

Read only | read_only: ☐

Hidden | hidden: ☐

Disable automatic slot fill based on user context | disable_initial_slot_fill: ☐

Question

Specify the Question that explains the options available to the end user when ordering the item

* Question | question_text: Laptop Model

* Name | name: laptop_model

Conversational label | conversational_label:

1 to 4 of 4

4. Create Catalog UI Policies

1. Click on all>> search for service catalog
2. Select maintain item under catalog definition
3. Search for 'laptop request' which is created before
4. Select 'laptop request' and scroll down click on "Catalog Ui policies"
5. In the catalog ui policies related list tab click on new
6. Give short description as: show accessories details
7. Set the Catalog Condition in the related list tab 'when to apply'
[field: additional_accessories, operator: is, value: true]
8. Click on **save**.(do not click on submit)
9. Scroll down and select 'catalog ui action'
10. Then click on new button
11. Select variable name as: accessories_details Order:100
Mandatory: True
Visible : True
12. Click on save and again click save button of the catalog ui policy form

Team Project- show accessories details | Catalog UI Policy | Team Project

Catalog UI policies are similar to standard UI policies. Catalog UI policies dynamically change variables that are part of a catalog item or change how variable sets are handled. Policies can also be applied when the variables are present in a Requested item or Catalog Task form. [More Info](#)

Applies to: A Catalog Item
 * Catalog Item: Laptop Request
 * Short description: show accessories details

Application: Global
 Active: ☒

When to Apply: Script

Catalog UI policy actions are applied only if all the following conditions are met:

1. The catalog UI policy is Active
2. The items in the Conditions field evaluate to true
3. The field specified in the catalog UI policy is present on the specified catalog item

Catalog Conditions: Add Filter Condition Add OR Clause

additional_accessories is true

Applies on a Catalog item view: ☒
 Applies on Catalog Tasks: ☐
 Applies on Requested items: ☐

Apply the catalog UI policy actions when the form is loaded or when the user changes values on the form: On load ☒
 Reverse the effects of the catalog UI policy actions when the Conditions evaluate to false: Reverse if false ☒

7. Retrieving the update set

1. Open another instance in incognito window
2. Login with credentials
3. Click on all>> search for update sets
4. Select “Retrieved update set” under system update set
5. It open retrieved update set list and scroll down
6. Click on Import update set from XML

The screenshot displays the ServiceNow interface for 'Retrieved Update Sets'. The left sidebar contains a navigation menu with the following items: 'System Update Sets', 'Update Sources', 'Retrieved Update Sets' (highlighted), 'Update log', 'Local Update Sets', 'Merge Update Sets', 'Merge Completed Sets', 'Update Sets to Commit', and 'Update Set Commit History'. The main content area shows a table with the following columns: Name, Application, State, Update source, Description, Loaded, Committed, Parent, and Remote Batch Base. The table contains one row: 'Laptop Request Project' (Application: Global, State: Committed, Update source: (empty), Loaded: 2026-02-09 08:03:27, Committed: 2026-02-09 08:19:48, Parent: (empty), Remote Batch Base: (empty)). Below the table, there is a 'Related Links' section with a link 'Import Update Set from XML'. The top bar shows the 'Retrieved Update Sets' title and a search bar. The bottom of the page shows a pagination bar indicating '1 to 1 of 1'.

Name	Application	State	Update source	Description	Loaded	Committed	Parent	Remote Batch Base
Laptop Request Project	Global	Committed	(empty)		2026-02-09 08:03:27	2026-02-09 08:19:48	(empty)	(empty)

7. Upload the downloaded file in XML file
8. Click on Upload and it gets uploaded.

-
9. Open retrieved update set 'laptop request project'
 10. Click on preview update set
 11. And click on commit update set
 12. And also see the related tab updates
 13. After committing update set in this instance we get all updates which are done in the previous instance

7. Test Catalog Item

1. Search for service catalog in application navigator in target instance 2.
- Select catalog under service catalog
3. Select hardware category and search for 'laptop request' item
4. Select laptop request item and open it
5. It shows three variables only
6. As per our scenario, when we click on additional accessories checkbox then accessories details fields is visible and that should be mandatory
7. Now see the results, it fulfills our requirements.

The screenshot displays the ServiceNow interface for a 'Laptop Request' catalog item. The left sidebar shows the navigation menu with 'Service Catalog' selected. The main content area is titled 'Service Catalog > Hardware > Laptop Request'. The form includes the following fields:

- Laptop Model:** A text field containing 'Asus Vivobook 16'.
- Justification:** A text field containing 'education'.
- Additional Accessories:** A checkbox that is checked, with a label 'Additional Accessories'.
- * Accessories Details:** A text field containing 'Mouse'.

On the right side, there is a 'Shopping Cart' sidebar. It shows the item 'Laptop Request' with a quantity of 1 and a delivery time of 2 Days. The subtotal is £1,101.4402. Below the cart, there are buttons for 'Order Now', 'Add to Cart', 'Edit Cart', 'Proceed to Checkout', and 'Continue Shopping'.

8. Conclusion

- The *Laptop Request Catalog Item* was successfully developed and tested using best practices. It features dynamic input handling, reset functionality, and secure deployment using update sets. This ensures fast, error-free laptop requests with complete visibility and audit tracking, improving both user experience and IT governance.
